

Spill Tray – 20 Liter

Product Benefits

- Manufactured from **100% tough and durable polyethylene**
- Can be deployed for a variety of applications
- Available in a variety of different sizes
- **Sump volume:** 20 liters
- **Dimensions (mm):** 600 (l) x 400 (w) x 155 (h)
- **Weight (kg):** 2
- **Item Code:** FL-205-511

The 20 Liter Spill Tray is a lightweight and compact secondary containment product **designed for catching minor leaks and spills and also storing small drums and containers.**

It is constructed from **polyethylene** so it will not corrode like a metal drip tray and is compatible with a wide range of chemicals.

It has a **20 liter sump capacity** and can help keep you in line with the **Environment Agency Pollution Prevention Guideline 26.**
