

## Environmental Non Spark Safety Products

### Standard Blade Shovel

Standard sized blade and solid reinforced shaft ensures that this shovel is lightweight yet durable and ideal for a variety of applications. A great all round shovel. Extended and super extended shafts available for jobs requiring extra reach.

The Environmental Safety range is designed for use in many general applications for its resistance to the majority of chemicals and for its non-spark properties.

Each product is manufactured with an additive to attract moisture to the surface and assist in reducing the buildup of static charge.

Manufactured from high-grade polypropylene color compounded to BS 5378 safety green, the comprehensive range of Environmental Safety hand tools is lightweight, virtually unbreakable, will not rot or rust and exhibits excellent wear resistance against concrete and hard floor surfaces.
